

## Warranty Belt Replacement Procedure

First the purchaser must contact Gboost and supply them with clear and accurate photos of the belt with a copy of the purchase receipt. From there, we will determine if the belt will need to be return for inspection at purchaser's cost. Once we receive the belt and confirm that it has a defect in material and/or workmanship, we will provide a replacement belt with a \$25 handling fee. Or if needed, the customer may purchase a new belt and when we receive the old belt and deem it has a warranty issue, a refund will be given, minus the \$25 handling fee. Fill out form below and return with proof of purchase and the defective belt. Additional charges for shipping outside of the USA. GBoost warranty claims expire 30 days after contact date.
